The QuatroSpa

Whether for relaxation, therapy or just good fun, our super-size QuatroSpa is an outstanding value-for-money, portable performance spa with a superb specification, seating for 5-6 people and a choice of low maintenance, weatherproof decorative surrounds.

The QuatroSpa has been carefully contoured to provide smooth, full depth seating and a generous footwell for the most natural resting position. While the specialised reclining therapy seat will provide a unique massage for even the tallest people and the large entry step offers easy access and doubles as a child seat.

Our combination of the latest high-tech spa systems ensure the QuatroSpa is unrivalled in it's class for specification, value and durability. With digital control system, high volume adjustable rotating spa jets, forced air blower systems, tranquil LED lighting and ozone sanitisation. Fully automatic heating and pumping systems and high capacity 50ft square pressure filters for unbeatable filtration. It has the strength and durability to last a lifetime and is extremely economical due to it's insulated construction. Installation or re-positioning is never a problem as weighing in at only 130kg, it can be easily rolled, lifted or slid into position by two people.

Personalise your QuatroSpa into a unique spa that is right for you. We offer a choice of spa specifications, colours and accessories including weatherproof cedar finish side panels and a selection of optional crafted grade one cedar surrounds.

Relaxing, Revitalising, Rewarding. RotoSpa.

Built To Last. Designed To Perform. **Superb Specification:**

The QuatroSpa uses a high flow manifold distribution system that delivers air and water individually to each jet, at equal pressures, to ensure a uniform and powerful performance.

The latest adjustable therapeutic and rotating massage jets have been strategically positioned to give various massage effects in each seating area. Massage away the stresses of the day in the Captains Seat with it's 15 point ultrablast master massage jet for the ultimate back massaging experience. Or relax and revitalise with the turbo air injection system that adds millions of tiny energising air bubbles to the water – behind your back, around your legs and under your feet – a most invigorating massage .
