come home to a canadian spa

Ever since the Romans invented baths, people have enjoyed the indulgence and feeling of rejuvenation provided by a hot spa. Now you can enjoy what was once an occasional luxury every day of the year in your own garden.

The Canadian Spa Company, one of Canada's leading manufacturers have years of experience in outdoor leisure products and only the very best components, the quality and attention to detail is second to none.

*Troy Labelle
Founder*

www.canadianspacompany.co.uk

pressure points

All of our spas incorporate a unique pressure point system, which delivers soothing water to specific points on the body. If your problem area is in the hard to reach neck or shoulder region, many of our spas have a unique moulded neck support with recessed neck jets, creating a truly invigorating experience. Additionally, across all our spas, various types of jets allow you to massage different muscles with different water pressure.

Air controls mean you can adjust the jets – from a soft gentle massage or a vigorous work out.

spas that last

All spas have high quality stainless steel jets. The proven efficiency of this jet system assures you a reliable performance that you will enjoy for years to come.

The shells are made from super tough, four layer bonded plastic and acrylic, which eliminates any blistering or cracking.

choose your location

When thinking about where to position your spa pool, you should consider:

- The view from the house to the spa, and the view from the spa itself.
- Ensure quick and easy access from your house to the spa.
- Direction of drainage. Water should always drain away from the spa. Do not locate your spa in a low run-off area – rainwater could flood the area and cause pump and equipment damage.

- If you are installing the spa within a deck, the entire spa base must be sitting directly on the prepared base. The lip of the shell must not support any weight.
- The minimum clearance for entry to the spa's access panel for servicing is 1 metre.
- The spa should not be located near or under overhead wires and must be kept clear of all electrical appliances.

planning permission

Under normal circumstances planning permission is not required, but we recommend consulting your local planning office prior to purchase.

pre-delivery preparation*

- The site you select for your spa must be a flat, level continuous surface that contacts the bottom of your spa fully.
- Spas weigh between 900kg and 1,400kg when full, so a solid support is essential. A 10-15cm thick reinforced concrete slab is ideal, but not a requirement. In most cases your spa can be placed on a properly fitted existing patio. Your spa can be mounted on a deck, but it must be of solid construction. Either way, it is recommended you install your spa at ground level to allow easy internal access.
- The base needs to be at least the same size as the footprint of your spa. Check individual spa measurements for details.

- European The power supplied must be a dedicated RCD protected circuit. You will need to get a qualified electrician to undertake this work (check spa for Amp requirement).
- Plug and play models plug directly into a 13Amp socket.

delivery and access

The spa will arrive as a unit and cannot be dismantled. You will need to have sufficient clearance for the spa to be rolled into place on a trolley, either on its side or on its base. (See measurements for each spa.)

**All sizes and specifications are approximate and we reserve the right to change without notice.*

spa health benefits

Relieve stress and pain

The massaging action of a spa will accelerate the healing process of aches and pains. Warm, swirling water reduces stress and allows you to rest, giving a better night's sleep by refreshing your body and mind to tackle the next day. Sufferers from arthritis with painful or inflamed joints will find that hydrotherapy will help relax the muscles and allow a greater range of motion in the joints.

ARTHRITIS

Painful or inflamed joints can cause muscles to tense in an effort to protect them. Warm water and hydrotherapy help relax the muscles and allow greater range of motion in the joints. Pain is often reduced, even after leaving the spa.

BUOYANCY

When submerged in water your body is about 1/10 its normal weight. Buoyancy is a key element of relaxation and stress relief. It helps overcome the effects of gravity and relieves stress on the joints.

EXERCISE

Exercising can cause microscopic tears in the muscle and lactic acid build up. The warm massaging action of a spa will accelerate the healing process, and allows the lactic acid to be carried away from the muscles. As muscles relax and pain eases you move more easily with less pain.

SLEEP

Warm swirling water reduces stress and allows you to rest and get better night's sleep. Sleep deepens as body temperature drops. Experts' recommend that people who suffer from sleeplessness soak in a spa at 100° to 104°F for 15 minutes before bedtime.

PAIN RELIEF

Endorphins are natural painkillers for the body. Warm water stimulates their release. When the body is in warm water, blood vessels near the skin relax.

built tough, built to last

We take pride in using only the best components in the industry, such as genuine Aristech or Dupont Acrylic sheets for unsurpassed product protection. Canadian Spa Company uses only the finest components from the industries leading manufacturers for exceptional durability.

Features to look for when choosing your spa.

- Multi-level seating - different jets provide a new spa experience in each seating position.
- Body contoured lounge shaped for comfort and support so you can lay down and really relax.
- Powerful water pumps ranging from 4hp up to 8hp
- Electronic control pad - for temperature, filter cycles, water jets, air jets and lights.
- Heater to keep your spa at a constant 40°C.
- Cover - custom fit to minimise operating costs and maintain and maximise safety.
- Ozone cleaning system - an ultraviolet light system acts to automatically ozonate the water at regular intervals, to disinfect and kill bacteria in the water.
- Interactive jets - can be easily manipulated to blow heated air and heated water in varying combinations for different effects of massage.
- Aromatherapy unit -built in unit as part of the hot air blower system to capture the power of scent to enhance relaxation and improve your overall state of mind.
- Steps for easy access to the spa.
- L.E.D Light with changeable blue/red/green L.E.Ds to create the mood of your choice.
- Chemical kit to keep water clean and fresh.

Solid Frame Construction

A Canadian spa company spa is built from the ground up with a totally enclosed floor and reinforced framing.

Water filtration

For complete flow-through purification, Canadian spa company uses a single or dual canister filter system.

Energy Efficient Motors

Quiet and powerful, 4Hp pumps provide consistent water pressure throughout the spa.

Pressure tested plumbing

Every fitting is secured and pressure tested. The lines are routed throughout the spa to allow for precise jet allocation and maximum efficiency.

Water Diverter Valve

Divert the flow of water instantly to separate jets around the spa with a simple turn of the dial.

Deep soaking seats

Canadian spa company designs each comfort zone with a variety of jets from vigorous to gentle to achieve a complete body massage and improving energy efficiency.

Ozone Cleaning System

A Plasma Bubble acts to ozone the water at regular intervals disinfecting and controlling bacteria in the water.

High density foam insulation

Foam between the spa shell and cabinet creates a thermal barrier which insulates and retains heat, whilst protecting the plumbing and improving energy efficiency.

Control Panel

Finger-tip controls allow instant adjustments to water temperature, preprogrammed filter modes, individual pumps, blower and lighting.

Heater Air Blower (optional)

Unleash thousands of tiny heated bubbles into the air and water jets to relax pressure points.

Air Flow Control

Adjust the massage action and jet pressure by changing the air flow.

Shut-off 'T' Valve

'T' water valves are located in front of pumps to prevent water loss during any maintenance or repairs.

Drainage System

Canadian spa company conveniently located the drain system at the bottom of the spa for easy maintenance.

Plug & Play Spas

Yukon 2 person spa

Our smallest spa offering all the features you would expect from our larger spas.

This little dynamo provides deep massage whilst you relax and enjoy the sound and LED light therapy.

This spa can also be converted to a luxury bath.

Spas

Spa jets, controls & lighting

LUXURY JET PACKAGE

Every Canadian Spa comes plumbed with the most advanced therapeutic jet system available today.

Our large calibre, high-flow water jets guarantee a smooth, even flow that penetrates deep down to the soft tissue and muscle layers, without the sharp piercing pressure of narrower jets. Every detail of our jets is honed to maximize therapy and leave you relaxed and revitalised.

Power is nothing without control and both the flow and pressure of our jets can be adjusted and focused.

Divert them towards yourself for a solitary soak or share the wealth of jet combinations with friends and family. Arrange them to massage the whole body or concentrate their power on individual areas, pinpointing areas of stress and strain, such as neck and back, wherever you desire.

ULTIMATE CONTROL

We know that everyone is different, so for an experience that is as individual as you are, why not choose from a range of specialised jets to provide exactly the type of massage you require, all at the flick of the wrist!

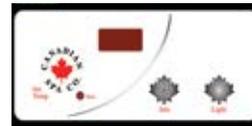

Our new stainless steel jets gives you technology that is as stylish as it is advanced and sets your tub apart.

ADVANCED CONTROLS

Canadian spa offers one of the most technologically advanced and user-friendly control units available. Engineered to perform in any weather, the digital temperature display has solid-state accuracy and the self-diagnostic feature of the controls allows for easy servicing.

In fact, in many cases our service technicians can isolate and solve problems right over the telephone.

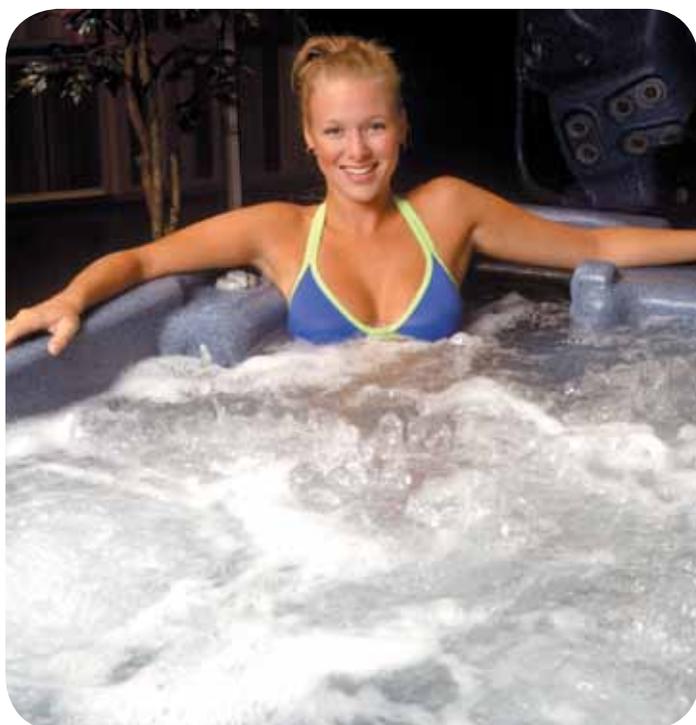

Aurora Premium Light System

Canadian Spa has brought in an un-rivaled lighting system to our models. Enjoy perimetre LED lights, large underwater LED's and a cascading LED backlit waterfall all easily controlled at a touch of a button. Chose from various colours and effects such as slow fade, constant and strobe.

Toronto Aurora 6 person spa

Swim Spas

St Lawrence 16'

Your Swim Spa work out

Aquatic exercise is rapidly growing in popularity across the country. Unlike other swimspas, the St Lawrence has a large flat floor with no hidden obstacles - which is ideal for a wide range of activities. You can jog in place against a gentle current. Or, with the current off, you can experience the benefits of resistance training and range of motion exercises.

Thanks to the St Lawrence, you can now enjoy the full-body effects of aquatic exercise saving you time in the privacy of your own home.

Swim Spas

Unique swim lane system

With all the benefits of a full size pool without the drawbacks, the St. Lawrence swim spa is a swimmer's dream delight! New for 2011, River Jet technology and a full body lounger to unwind. With 5 Swim Jets - 3 resistance and 2 swim-profile adjusting jets, creating the Canadian Spa unique Swim Lane System. The swim jets create currents from a gentle flow - perfect for water jogging and resistance exercises. As experienced swimmers know, one of the challenges is "staying in your lane." Differences in side strength and stroke patterns create a tendency to pull to one side or another. Canadian Spa unique Swim Lane System keeps you "in the groove" with our 3 Swim Jets that keep you centred in the swim lane. After a good swim, relax with a soothing massage in one of the two multi-jet Captain's Chairs at the spa ends or 2 bench seats.

• Galvanised steel frame

- Sturdy galvanised steel frame cradle for supporting the swim spa

• Raised floor

- Raised floor at the spa end ensures comfortable secure seating

• 200 sq ft Filter

- Large filter capacity for crystal clear water

• Swim Trainer

- New swim trainer uses resistance bands enabling the swimmer to swim 'with or against' the stream

Saunas

sauna benefit/features/well being

With many benefits associated with relaxing in the soothing heat of an infrared sauna and with lower air temperatures than those of a traditional sauna, a Canadian Spa Infrared sauna allow the user to stay in longer, resulting in more benefits than a traditional sauna with less shock to the body.

Healthy Heart:

For those who are unable to perform regular exercise increasing your heart rate while sitting in an infrared sauna can be a viable alternative. It is important to give your heart muscle a work-out on a regular basis.

Remove Toxins:

We are inundated with toxins of all types like never before. They are in the food we eat, the air breath, and on the things we touch. It has never been more important to rid our bodies of these types of toxins. There is no doubt that the increase in allergies, chronic fatigue, headaches, and sugar imbalances are related to these factors. Sitting in a sauna and increasing your core temperature helps accelerate the drainage of these toxic materials by increasing blood flow through the skin via sweat.

Exfoliate:

There is no spa treatment which is as effective as nature's own way of cleaning your skin pores – sweating. Your skin will look and feel younger.

Burn Calories:

There is no replacement for a healthy diet and exercise for achieving weight loss. It is a question of calories in versus calories burnt. Try adding 30 minutes in a Canadian Spa sauna after your workout and see what happens. A 30 minute session can burn up to 700 extra calories.

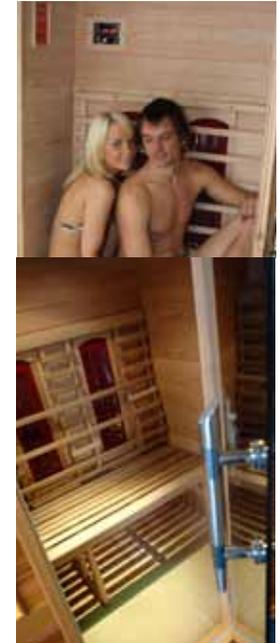

Better Circulation:

As the body works to cool itself, there is a substantial increase in heart rate, cardiac output and metabolic rate thus improving circulation. Blood flow during whole-body hyperthermia is reported to rise about 50 percent.

More blood circulation has the obvious benefits of helping injured muscles repair faster as oxygen rich blood circulates through the body, improving the body's immune system. Drainage of toxic materials is accelerated. An oxygen rich blood supply helps to restore the body's natural balance.

Relieve Stress

Sit back and relax. Add the soothing sounds of your favourite music. The results will be obvious. You deserve it!

Chilliwack (1-2 person sauna)

Dimensions: 900 x 900 x 1900mm
Power: 1200W
Heater panels: x 3

Chilliwack Saunas are designed for ease of use and is an outstanding value. Assembly is a snap and takes about 15 minutes. Enjoy the convenience of operating a Chilliwack Sauna with soft touch control panel and LED display featuring sauna temperature and time functions. Play your favourite music with our sound system with 2 speakers. The sauna plugs into any dedicated 13 amp outlet so no special wiring is required and the sauna may be installed on carpet or any indoor location including basements, the garage, master bath or walk in closet.

Huron (2-3 person sauna)

Dimensions: 1200mm x 1050mm x 1950mm
Power: 1800W
Heater panels: x 5

The Huron Sauna is constructed from the finest western red cedar. Infra-Red heaters direct FAR infra-red waves at your skin, which heat your body, but not the air around it so much ... This means that the elements consume far less power, because they not only heat the body directly, but also do not need to be turned on for a long time before bathing commences.

Standard features for all saunas:

- Plugs directly into a 13 amp socket.
- Drop-down high quality stereo system with CD and AM/FM tuner
- Interior reading light
- tempered Glass door with 180 degree opening

Algonquian (4 person sauna)

Dimension: 1750 x 1200 x 1950mm
Power: 2400W
Heater panels: x 7

The Algonquian (Al-Gone-Cue-Ian) Sauna from The Canadian Spa Company allows you can stretch out your legs in while you sit comfortably on the seat with your back against the specifically tailored backrests. As with all the models, the 4 Person Algonquian Classic Sauna has all the same health benefits and impeccable style as the others in the range, yet with ergonomic seating for four adults. The opposite-facing bench seating also makes it easy for two adults to stretch out, taking full advantage of their sauna experience

- Interior and Exterior Digital Control Panels
- Sculpted ergonomic timber backrests

Gazebos

Gazebos can create a safe, warm environment so that you can enjoy your spa all year round! Complete the package and turn your home and garden into a home resort with our brilliant range of timber gazebo accessories and products.

Fraser (10'x10')

- ABS terracotta roof/ Grey
- Two louvered sides
- Skylight
- Rounded corners

warranty

LIMITED WARRANTY

Canadian Spa Co. Manufacturing extends the following warranties to the original purchasers of its portable spas:

Structural Warranty: Canadian Spa Co. warrants structure of the spa shell against water loss due to structural failure for the period of 25 years from the date of purchase by the original owner.

If in Canadian Spa Co. opinion, structure proves to be defective Canadian Spa Co. will repair or, at its option, replace the defective structure without charge to the customer.

Surface Warranty: Canadian Spa Co. warrants the acrylic finish against defects in material and workmanship and specifically against blistering, cracking or delamination for the period of Three (3) years from the original purchase date to the original purchaser.

In Canadian Spa Co. opinion, the surface proves to be defective during this period, Canadian Spa Co. will repair or, at its option, replace the defective spa shell without charge to the customer.

Plumbing Warranty: Canadian Spa Co. warrants the plumbing of the spa will remain free from leaks for the period of two (2) years from the date of purchase to the original purchaser.

Equipment Warranty: Canadian Spa Co. warrants the equipment pack (pump, blowers, heater, and control system) against malfunction and defects in the materials and workmanship for two (2) years from the date of purchase to the original purchaser.

Skirting Warranty: Canadian Spa Co. warrants the wood skirting surrounding the spa to be free from defects in materials and workmanship at the time of purchase. Because wood is a natural product and subject to weathering, any fading, crazing, cracking or warping of the wood finish is not covered. Synthetic skirting may also have the same weathering all be it much slower

Extent of Warranty: This Limited Warranty applies to portable spas manufactured after January 1st 2010 and sold by authorised Canadian

Spa Co. dealers to residential retail customers. This Limited Warranty is given only to the first retail purchaser and terminates upon transfer of ownership. No warranty is provided on light bulbs, light lens covers, filters or any dealer installed accessories. Cost of installation, removal and/or shipping of the spa is not covered by this Limited Warranty. In the event Canadian Spa Co. deems necessary the removal of the spa to a place of repair or that the spa must be replaced, any and all costs of the spa removal and replacement; landscaping, decking, fencing and/or structure removal, alteration and/or replacement; or other costs of providing access to the spa will be for the purchaser. This Warranty applies only to spas in single family, residential installations. This Limited Warranty becomes void if the spa is placed in commercial application.

TERMS, CONDITIONS AND LIMITATIONS

Any defect or damage caused by installation, alteration or repair by anyone who is not an employee of Canadian Spa Co. or authorised service technician is not covered by the Warranty. This Warranty becomes void if the spa has been subjected to misuse, abuse, alteration or attempted alteration, repairs or attempted repairs by anyone other than an authorised Canadian Spa Co. service technician, improper installation, improper water chemistry, improper maintenance, acts of god, or damage caused beyond the control of Canadian Spa Co. Misuse and abuse shall include any operation of the spas other than as directed in the Canadian Spa Co. Manual.

Examples of misuse and abuse include, without limitation:

- Damage of the spa surface caused by leaving the spa uncovered while the spa is empty of water or due to covering the spa with plastic film of any kind.
- Damage to the spa surface caused by contact with cleaners or solvents.
- Damage caused by the operation of the spas at water temperatures outside of the range of 34 – 104 degrees Fahrenheit.
- Damage caused by unapproved sanitizer such as calcium hypochlorite, tri-chlor type chlorine or any sanitising chemical that may remain undissolved on the spa surface.
- Damage caused by failure to provide even sufficient support for the spa.

Warranty Performance: In the event of a defect covered under the terms of this Limited Warranty, notify your authorised Canadian Spa Co dealer. A Canadian Spa Co. authorised service technician will repair the spa subject to the Terms and Conditions of this Limited Warranty.

Use all reasonable means to protect the spa from further damage. Reasonable travel charges may be assessed by Canadian Spa Co. or its authorised service technician if the spa is located outside the nearest authorised service technician's service area.

This warranty covers parts ONLY and does not include travel or on-site service charges unless a Service Contract has been purchased from Canadian Spa Co. Ltd.

Disclaimers: Canadian Spa Co. or any of its authorised service technicians shall not be held liable for injury, inconvenience, loss of use, chemical or water damage, transportation costs, continent liabilities or any other incidental or consequential costs, expenses or damage as result of any deficiency or alleged deficiency of the spa.

In no event shall Canadian Spa Co. be liable, for any reason or cause, in excess of the amount paid for the product. No other warranties, expressed or implied, are valid. No agent, dealer, distributor, Service Company or other party is authorised to change, modify or extend the terms of this Limited Warranty in any manner whatsoever.
